

VAGISH N KORA

Aspiring Cybersecurity Engineer | Full-Stack Developer | AI/ML

☎ 8073623770 | vagishkora2003@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER OBJECTIVE

Cybersecurity engineering student focused on network security, threat detection, security monitoring, and AI-assisted cyber defense. Experienced in developing ML-based threat detection systems using network traffic datasets, with additional hands-on experience in Python, Linux, AI/ML, and computer vision. Active in ACM student activities and technical event coordination, with a growing focus on security research and practical defensive security systems.

EDUCATION

B. Tech in CSE — Cybersecurity | NMAMIT, Nitte, Udupi Aug 2025 – 2028

CGPA: 6.96 (3rd Year, Lateral Entry)

Diploma in CSE | NMIT Polytechnic, Yelahanka, Bengaluru 2022 – 2025

CGPA: 8.42

Class X | Vasavi Educational Trust VV Puram, Bengaluru 2020 – 2021

68%

EXPERIENCE

Technical Co-Head | ACM Student Chapter — NMAMIT Jul 2026 – Present

- Contributed to planning and execution of a five-day DSA workshop covering Arrays, Stacks & Queues, Linked Lists, Strings, and Binary Trees.
- Designed technical content, coding activities, and the interactive offline finale to introduce DSA to junior students.
- Co-managing the club's technical committee, digital platforms, hackathons, and coding competitions with the executive board.

Full Stack Intern | Thaniya Technologies, Mangalore Dec 2025 – Feb 2026

- Built and maintained full-stack web applications handling front-end interfaces, back-end APIs, and database integration.
- Contributed to production-grade projects under senior developer guidance, improving code quality and delivery timelines.
- Worked with REST API integration and relational database management across client projects (MSME certified internship).

AI/ML Intern | Karunadu Technologies Pvt Ltd, Bengaluru Aug – Dec 2024

- Gained hands-on experience with data preprocessing, cleaning, and analysis for ML model pipelines.
- Implemented machine learning algorithms under senior guidance using Python, TensorFlow, and PyQt5.

Narrative AI Developer (Contract) | FABLE, Bengaluru Jan – Apr 2025

- Developed interactive fiction with branching storylines and AI-driven narratives to enhance user engagement on the Fable platform.

PROJECTS

[SecureOS- Desktop & Web Operating System Simulator](#) 2026

- Architected a desktop OS simulator with a custom window manager, multi-user **Indexed DB storage**, and dual target deployment across Electron and Vercel.
- Implemented client-side security primitives including **PBKDF2-SHA256** password hashing with 16-byte random salts, brute-force protection, and **AES-GCM** encrypted vault storage.
- Designed and append-only, **SHA-256 hash-chained audit log** with deterministic serialization to cryptographically verify event log integrity.

Tech Stack: React 19, TypeScript, Electron, Zustand, Web Crypto API

[Wealth Nest — AI Personal Finance Dashboard](#) 2025

- PWA to track stocks, mutual funds, and expenses with Llama 3.3 (Groq API) AI insights, gamified saving (streaks, XP, badges), and interactive charts.

Tech Stack: Next.js, React, Tailwind CSS, Prisma, Groq API

[AI-Based Network Intrusion Detection System](#) 2025

- Developed an ANN-based model to classify network traffic as benign or malicious (DDoS, Brute Force, Infiltration) using the CICIDS2017 dataset.
- Performed feature engineering on 80+ network flow parameters; achieved 90%+ accuracy with a real-time traffic analysis pipeline.

Tech Stack: Python, TensorFlow, Keras, Scikit-learn, CICIDS2017

- Implemented multi-layered client-side authentication and session validation for an administrative control panel to manage production database schemas.
- Built real-time telemetry pipelines and automated state-sync fallback routines to maintain system availability during backend network disconnections.

Tech Stack: Next.js, React 19, TypeScript, GSAP, Supabase, Tailwind CSS

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, Bash

Web & Full-Stack: React, Next.js, Node.js, Vite, HTML5, CSS3, Supabase, PostgreSQL, REST APIs

Security: Network Security, Snort IDS, Ethical Hacking, OWASP Top 10, Wireshark, Burp Suite, PKI

AI/ML: TensorFlow, Keras, Scikit-learn, OpenCV, PyTorch, LangChain, Groq API

Tools & OS: Git, GitHub, Docker, Linux, Windows, VS Code

Soft Skills: Problem-Solving, Technical Leadership, Team Collaboration, Self-Learning, Presentation

CERTIFICATIONS & COURSES

Google Cybersecurity Professional Certificate Google / Coursera	In Progress
Ethical Hacking Workshop IISc Bangalore	Nov 2025
Hedera Blockchain Developer Workshop NMAMIT, Nitte	Oct 2025
Cybersecurity Job Simulation Mastercard / Forage	Mar 2025
Cybersecurity Internship Edunet / AICTE	Jan 2025
AI & Data Analytics (Green Skills) AICTE	Jan 2025
Data Analytics & Visualization Accenture / Forage	Jan 2025
Cybersecurity Analyst Tata / Forage	Jan 2025
Artificial Intelligence & Machine Learning Karunadu Technologies	Aug-Dec 2024
Career Edge — Young Professional TCS Ion	Dec 2024
MasterCraft Data Plus TCS	Dec 2024

COMMUNITY & OUTREACH

Participant — Ethical Hacking Workshop | Pravega, IISc Bangalore

Nov 2025

- Attended a two-day hands-on workshop covering network exploitation, web vulnerabilities, and real-world attack simulations.

Speaker — Cyber Awareness Session | Belman PU College

Oct 2025

- Delivered a cybersecurity awareness session to 100+ PU students covering phishing, social engineering, and safe digital practices.
